Abstract

The China GDP (Gross domestic product) has developed near times recently, so the practical meaning should be discussed throughout for our scholars to consider and make absolutely to go on maintaining its complexion. Maybe after seven years China could realize its modernization to occupy the top one position to wield its effectiveness in the world. At the same time the recruiting working can offer many opportunities to progress the schedule in order to affect its effectiveness and proceed many explorations like quantum computer's study and high technique's AI (artificial intelligence) programme and equipment. Only using both of them would we make our nationality to realize modernization of China economic complexion which has become this study's destination? We should continuously and frequently put our study to the sustainable research on Chinese GDP & cutting edge technique up raising with sustainability. The scholar's publication with their behaviour and judgement will be accepted and released by journal editors therein the research content can exhibit in hard-copy and soft-copy for exposing cutting edge technique research activity which may imply the current and future's research direction and content for us to consider and find. Therefore we should realize and be aware that point whose efforts can last long time as for the scholar and researcher's activity like conference and publication in famous summit and journal. The conference and journal volume can be issued the cutting edge content and technique knowledge and experience which reflects many sides of current research directions.

Keywords: Research; Developing; Finance; Statement; Economic; Scholar; Behavior; Judgement; Journal; Sustainably; Field; Cutting edge

Introduction

The China Provinces GDP have increased recently ten times so that the detail discussions can be done in order to ordinarily know the reason and future forecast. As we know China has accelerated its developing step from 1993 to 2011 so what the ultimate factor is will affect the future situation among each economic community. Since China has enough elasticity to recover its big economic community the economic developing speed has

approached American before COVID (Corona virus disease)-19 pandemic happened. But now Russia-Ukraine conflict and Palestine-Israel conflict even Syrian conflict happened the world economic complexion has occurred some. The America and Nato (North atlantic treaty organization) is able to acquire big military fee from them so that the America and Europe will continue to maintain their advantage in world as well. It has been a period to develop China economic level to continue complete progression for the sake of overwhelming American economic entity. Maybe

after more than seven years China has to exceed USA becoming No. one occupation [1-6].

We should stabilize to push our many policies to complete setting target sustainably and continuously so many innovative technologies will be owned and developed for leading to world economic situation. We still have much things to proceed like infrastructure, generator, vehicle making etc. projects to do attained a higher level and capacity. So we still demand many scientists to make their contribution to our modernization promotion. The recruiting high technological scientists have to be maintained our scientific leading innovation. It can pay much time and endeavour to finish that aim continuously. So that much endeavour should be put for realizing our modernization sustainably that will be through our efforts to practise definitely

and absolutely. We should realize and be aware that point whose efforts can last long time as for the scholar and researcher's activity like conference and publication in famous summit and journal. The conference and journal volume can be issued the cutting edge content and technique knowledge and experience which reflects many sides of current research directions.

Discussions

Top six main country GDP ranking

The six big one's GDP list could exhibit in Table 1 whose value attains 21.3~5.0 trillion dollars by America, China, Japan in 2019 respectively (Table 1).

Table 1: The top six main one's GDP list, trillion dollars (unit).

Year	America	China	Japan	Germany	Britain	India
2019	21.3	14.6	5	3.9	2.7	2.7
2017	20.2	13	5	3.9	2.7	2.6
y-o-y	5.40%	12.30%	0	0	0	3.80%

Table 2: The top seven~thirteen main one's GDP list, trillion dollars (unit).

Year	Britain	France	Italy	Canada	Brazil	Korea
2019	2.7	2.6	1.9	1.7	-	1.6
2017	2.6	2.6	2.0	1.6	1.9	-
y-o-y	3.8%	0	-5%	6.2%	-	-

Table 3: The India and China provinces GDP statistics, trillion yuan (unit).

Year	Gunagdong	Shandong	Jiangsu	Zhejiang	Henan	India
2011	5.6	4.2	5.3	3.4	2.8	12.8
2016	16.2	8.2	7.7	4.7	4.0	16.2
y-o-y	185%	95.2%	45.3%	38.2%	42.9%	26.6 %

Table 4: Singapore &China cities GDP analysis in 1990~1992.

Year	Singapore	Shanghai	Beijing	Guangzhou	Shenzhen
1992	52	20	12.6	12.2	7.4
1991	46	20	12.7	8.6	5.6
1990	37.2	17.2	11.5	7.4	4.6
y-o-y	13%	0	-0.7%	42%	32%

At the same time the China would reach 12.3% with the highest speed rate within 2017~2019 and the India arrives 3.8% speed rate with the third speed rate while the America retains 5.4% increase rate occupied the second one on the whole. The America and China one occupied 34.9 trillion dollars totally which dominates 71.5% in those six main communities. On the other hand the China and Japan difference will arrive 9.6 trillion dollars which explains the second one's economic communities revives rapidly and the third one is limited resource by the badly

processing trade [1]. The Britain, France has recorded the seventh~eighth position with 2.7~2.6 trillion dollars while Canada, Korea attains thirteenth one with 1.7~1.6 trillion dollars accordingly in (Table 2). On the other hand, the Canada has retained 6.2% y-o-y highest speed rate while the Italy remains -5% y-o-y in 2019-2017. In addition, the Brazil attains 1.9 trillion dollars in 2017.

India & China top five provinces GDP comparison

The Guangdong, Shandong can dominate the first~second GDP in 2016 with the highest 16.2~8.2 trillion yuan whose y-o-y attains the highest 185%~95% respectively according to (Table 3). On the other side the Zhejiang can indicate 3.4 trillion yuan whilst the Henan indicates 2.8 trillion yuan in 2011. On the contrary the India GDP could afford 16.2 trillion yuan whose value may reach Guangdong province one in 2016 with y-o-y 26.6% [2].

Agricultural mechanics industry general product

The agricultural mechanics industry general product has been displayed in Figure 1 where the tendency is about to raise gradually from 280 to 395 billion RMB in 2010~2014. Meanwhile the times with 2014~2010 will arrive 1.4 ones. The increase speed ratio may approach 4% within 2014 and 2013 (Figure 1).

Figure 1: Agricultural mechanics industry general product in China.

Singapore & China cities GDP comparison

The Singapore and Shanghai would lead to the first and second GDP amount with 52 billion USD~20 billion one whose y-o-y attains 13%~0% in 1992 accordingly in light of (Table 4). Meanwhile the highest speed had been occupied by Guangzhou and Shenzhen in turns which means their potential economic entity will be stronger. On the other hand the deviation used here will retain 18.0%~8.6% with the average one of 12.6%.

Graduate examination enrolling analysis in 2025

In 2025 China graduate examination enrollment has largely reduced 500 thousand to attain 3.88 million. However the recruiting amount will be 1.10 million one whose examination-free amount can provide 150 thousand [2]. The China undergraduate enrollment amount may arrive 4.8 million whose 985 university recruits about 200 thousand. In China there is the examination-free qualified ones to be about to become 367 units. There are other general units which is not 985 may divide the qualification enrollment of examination-free. In general the

Tsinghua and Perking university may surpass 50% while the eastern China five units can surpass 40% and only 5% is for general colleges.

CAFTA 3.0 (China-ASEAN Free Trade Area)

It will introduces new areas of cooperation as following in China-Asean trade. 1. digital and green economy; 2. supply chain connectivity; 3. competition and consumer protect & MSMEs (micro, small and medium-sized enterprises) [7]. Meanwhile the cornerstone FTA (Free Trade Agreement) upgrade set to be signed in 2025. The new version to deepen commitments in existing areas as following. 1. customers procedures and trade facilitation; 2. standard, technical regulations & conformity assessment procedures; 3. sanitary & phytosanitary; At the same time, the agenda would propose as below. 1. pandemic posed challenges to global trade; 2. negotiations to upgrade CAFTA launched in 2021; 3. agreed in 2024, and to be signed in 2025. The history of it would be as following. 1. first FTA for China; 2. First FTA for ASEAN with external partner; 3. signed in 2002. The first upgraded in 2014 and signed in 2015 has improved upon rules of origin, the customers procedures and trade facilitation, investment, economic and technical cooperation market access for services. On the other side the total investment amount between China and BRI partner countries reached 380 billions USD [8].

Five futures exchange in China

The five futures exchange will reduce relevant procedure fee from 2025 where it includes Shanghai Exchange Dalian Commodity Exchange Zhenzhou Commodity Exchange Guangzhou Futures Exchange China financial Futures Exchange [9]. Meanwhile the three aspects for promoting futures is proposing as following. 1. reduce market participant exchange cost; 2. promote futures market develop healthily; 3. afford more excellent risky management service for entity economy. In 2023 China digital economic key industry had enhanced value to be breakthrough 12 trillion yuan occupied GDP rate 9.9%.

In order to reduce futures exchange cost and enhance its benefit the general regulation and risky control has to process necessarily and urgently for our investors & operation dealer to transact easily and beneficially. AI futures diagnosis tool can be used to predict its developing tendency for being more fast and precise which can bring out many chances of profit.

Baidu academy analysis and publisher calling for papers

It will is joined by China Academy of Science which includes as following analysis for the sake of creating precise research knowledge service. 1. 120 million domestic & oversea website; 2. 0.6 billion domestic & oversea academic articles; 3. 1.2 billion

article with full text linkage; 4. 300 department's research direction; 5. 4 million domestic & oversea scholar main block; 6. 10,000 Chinese academic journals; 7.3 million research & development theme words [10]. To call for Papers and share Your Research Globally! Looking to publish your cutting-edge research? GAS Publishers invites you to submit your articles to our renowned journals, offering you an international platform to share your innovative ideas!

Our Journals have included the following ones. 1. GAS Journal of Arts, Humanities, and Social Sciences (GASJAHSS), ISSN: 3048-5002 (Online); 2. Global Academic and Scientific Journal of Multidisciplinary Studies (GASJMS), ISSN: 2583-8970 (Online); 3. GAS Journal of Engineering and Technology (GASJET), ISSN: 3048-5800 (Online); 4. GAS Journal of Education and Literature (GASJEL), ISSN: 3048-6777 (Online); 5. GAS Journal of Economics and Business Management (GASJEBM), ISSN: 3048-782X (Online).

Why Publish with GAS Publishers? The answer is Benefiting from fast publication times, a broad readership, and rigorous peer review, all designed to make your research reach the right audience.

Conclusions

The AI technique speed etc. Cutting edge one has developed more rapidly than expectation, so that we need to control with stably developed speed. The scholars like PhD, postdoctoral one & scientist can solve the technological knowledge and experience through their accumulated one so they can provide important role with designing and producing product like atomic bomb etc. high technological field whose leading effectiveness is proven by us frequently. There are many doctor graduated from American famous university can resolve the theoretical formula in order to simulate the atomic force network which may provide an important information and message before we process manufacturing procedure so it may indicate the general size in light of force which affords us the general design parameters usefully. Whereby we can avoid many times experiment even producing course deviation which may save many people labour and lots of expense. On the other hand the economic income for general man may attain through spending financial expense like recent golden price which can be affected through stabilizing world political situation, once there is war etc. accident it will indicate under controlling price increase which may bring out many chances by gambler like American & European organization. Thereby we must appropriately control economy even technique's rapider forwards speed from all of our efforts at all within our destination. Thereby we should realize and be aware that point whose efforts can last long time as for the scholar and researcher's activity like conference and publication in famous summit and journal. The conference and journal volume

can be issued the cutting edge content and technique knowledge and experience which reflects many sides of current research directions.
